## (54) PORTABLE TERMINAL

## (57)Abstract:

PROBLEM TO BE SOLVED: To improve operability at the time of incoming a call in a portable terminal which can be folded with its display part outside.

SOLUTION: A first case body part 1 having a display part 4 and a second case body part 2 having an operating part are linked through a linking part 3 having two rotary shafts. The case body having the display part 4 is allowed to have the two degrees of freedom of rotation, and provided with two receiving sound holes, that is, a first receiving part 11 and a second receiving part 12 so that the voice of the receiver can be generated from both the faces of the first case body part. Then, it is possible to perform quick transition from a state that the display 4 is folded face up to a speaking state only by opening the first case body 1.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision]

of rejection]

[Date of requesting appeal against examiner's  
decision of rejection]

[Date of extinction of right]
